PROCEDURES TO DEMONSTRATE ELIGIBILITY OF LANDS IN ZERO2NATURE™- PREFOR/PREBIO PROJECT ACTIVITIES

Version 1.0 - Sectoral Scope - 17

1. Project participants shall provide evidence that the land within the planned project boundary is eligible for a proposed ZERO2NATURE™-PREFOR/PREBIO project activity by following the steps below:

- (a) Demonstrating that the area of the proposed project activity is a forest at the start date of the project and presenting objective evidence that the vegetation in the area complies with the definitions of forest as per the ZERO2NATURE™ Standard;
- (b) Demonstrating that the project activity is the monitored preservation of the area, according to sectoral scope 17 of the ZERO2NATURE™ Standard and that the type of proposed activity is a ZERO2NATURE™-PREFOR/PREBIO project activity.

2. In order to demonstrate through objective evidence steps I(a) and I(b), project participants may present, among others:

- (a) Aerial photographs or satellite imagery complemented by ground reference data;
- (b) Registered documentation of the area(s);
- (c) Maps and national statistics.
